Study Objectives & Rationale

Study Objectives

Presidential Approval Assessment

Evaluate President Tinubu's performance and voter satisfaction levels

Socioeconomic Sentiment Analysis

Understand voter opinions on key economic and social issues

Candidate Viability Evaluation

Assess potential presidential candidates for the 2027 election

Study Rationale

Mid-Term Administration Review

Timely assessment of Tinubu administration's two-year performance

Emerging Political Trends

Identify shifting voter dynamics and coalition formation patterns

Data-Driven Intelligence

Provide actionable insights for political analysts and stakeholders

Study Overview & Methodology

Study Objectives

- Assess presidential approval & performance
- Understand voter sentiment on socioeconomic issues
- Gauge candidate viability for 2027 election

Survey Timing

May 2026 | Mid-term assessment of Tinubu administration

Target Population

Registered Nigerian voters aged 18 and above

1,000

Completed Interviews

6

Geopolitical Zones

Sampling Frame

Random Digit Dialing (RDD) telephone database

- Mobile and landline numbers included

Stratification Criteria

6 Zones

Population-weighted allocation

State-level distribution

Gender balance

Age alignment

Proportional representation

Sampling Design & Stratification

Age

Post-Stratification Adjustment

Zone Weighting Methodology

1

Calculate Actual vs Target Proportions

Compare sample distribution with population benchmarks

2

Apply Zone-Specific Weight Factors

Assign individual weights to each geopolitical zone

3

Iterative Raking to Population Totals

Adjust through multiple cycles to align with census data

Presidential Approval & National Direction

Conclusion & 2027 Election Implications

Key Takeaways

Economic Hardship Driving Realignment

85% report worsened personal economic situation since Tinubu took office

High Voter Engagement

90% of registered voters express intention to vote in 2027

Swing States Critical

Home state advantages and regional divisions will determine outcome

Electoral Confidence Crisis

90% lack confidence in free and fair election process

2027 Implications

High Turnout Expected

Despite challenges, strong voter participation anticipated

Economic Platform Essential

Candidates must address cost of living to secure votes

Opposition Coalition Gaining

Obi-Kwankwaso joint ticket emerging as leading opposition force (48%)

Governance Failures Driving Discontent

Performance-based voting patterns favor change candidates
